ADA / WCAG Checklist for ProSpine Orlando (EN, PT, ES)

1. Landmarks & Structure

- Added a "skip to main content" link at the top: "Saltar al contenido principal / Pular para o conteúdo principal / Skip to main content".

- Wrapped the main content in a real <main id='main-content'> region.

- Used meaningful headings (h1–h3) for sections like Mission/Office Hours/FAQ.

- Kept language attribute correct on each page: lang='en', lang='pt', lang='es'.

2. Images & Icons

- Gave informative alt text to meaningful images (logo, doctor photo, team, treatment images, flags, etc.).

- Set empty alt="" on purely decorative/loader images so screen readers skip them.

- Updated flag images so their alt text explains language selection, not just "image" or "pro".

3. Navigation & Menus

- Added proper labels and structure for the main menu (aria-label='Main navigation' / "Navegação principal").

- The mobile menu button now has an accessible label (sr-only text like "Toggle navigation / Alternar navegação").

- Ensured nav links reference the proper section IDs (#about, #chiropractic, #doctor, #testimonials, #contact, #location, etc.).

4. Keyboard & Focus

- Added a visible focus outline (:focus) so keyboard users can see where they are on the page.

- The skip link becomes visible on focus for keyboard users (tab key).

5. Contact Section (Accessible)

- Reworked Contact/Contato/Contacto into a more accessible section:

- Clear heading (h2) and explanatory text.

- Clickable WhatsApp logo with aria-label that describes what it does.

- Clickable tel: phone link with descriptive text.

- Clickable mailto: email link.

- Text now explicitly explains what each contact method does (especially the WhatsApp link).

6. Map Embed

- Added a meaningful title attribute on the iframe with Google Maps ("Map showing the location of ProSpine Orlando in Orlando, Florida" in each language).

7. Accessibility Statement

- Added an Accessibility / Acessibilidade / Accesibilidad section:

- States commitment to WCAG 2.1 AA.

- Explains users can report accessibility problems.

- Provides phone, email, WhatsApp, and address specifically for accessibility issues.

- Mentions a response window (within 2 business days).

8. Footer & Social Links

- Cleaned up the footer into 3 clear columns:

- Practice description & address.

- Office hours + contact.

- Social media & PayPal (each icon with aria-label like "Visit ProSpine Orlando on Facebook").

- Added a footer link to "Accessibility Statement / Declaração de Acessibilidade / Declaración de Accesibilidad".

- Ensured the copyright:

- Uses the current year via small JS.

- Is readable text, not just icons.

9. Miscellaneous Improvements

- Made sure phone numbers use international format in links: tel:+14073088878.

- Removed/avoided <font> and used CSS instead.

- Ensured text like office hours is plain, readable text, not embedded in images.
